

REMARKS

Amendment to Specification

The specification has been amended in order to incorporate the sequence listing into the application. The amendment does not add new matter.

Sequence Listing

Applicants have enclosed a sequence listing and have made the necessary request that it be incorporated into the specification. The sequence listing has been revised in order to describe the nature of the "n" residues in the SEQ ID NOs noted in the Error Report Summary. Support for the amendment can be found in Figure 4. Thus, the sequence listing adds no new matter and applicants respectfully requests its entry.

The sequence listing is believed to comply fully with the sequence listing rules. Under EFS-Web filing procedures, Applicants believe that they need to submit only an electronic version of the sequence listing in order to comply with the pending Notice.

Respectfully submitted,
McDonnell Boehnen Hulbert & Berghoff LLP
